

# There's only one question on this iQ test: Where is the switch?

You've been impressed with everything you've heard about IP consoles, with one exception. Some have said that you need to be an IT expert to install one. Axia heard your concern, and built iQ for you. iQ eliminates switch configuration with its built-in Ethernet switch. Mixing engine, power supply, I/O, and a built-for-broadcast switch all in one neat, fanless rack unit. There's zero switch configuration, zero finger-pointing from technical support, zero switch compatibility issues. And only Axia does it.

iQ really passes the test. You'll be able to send audio instantly to any studio. Eliminate distribution amps, punch blocks, patch bays, sound cards and that tangle of wire in the ceiling. You can control everything with your browser, even over the Internet. And connect to a huge variety of Livewire-equipped broadcast gear (more than 25,000 already working in the field) using only an Ethernet cable. Building this studio will be more fun than you've had in a long time. You place the order and smile, as you imagine the first of many weekends without a 3AM phone call. Brilliant!

**Power Supply:** Rugged, super-duty power supply with optional fully-redundant backup. No wall-warts on Axia gear.

**I/O Rack:** Plenty of professional, balanced mic, analog, AES and Livewire I/O in a fanless 3RU chassis.

**Heat Sinks:** Beefy heat-sinks look cool and keep cool - no noisy fans here.

**Ethernet Switch:** Built-in Ethernet switch lets you network devices and studios easily.

**DSP Rack:** Two Telos DSP hybrids with DDEQ, wideband AGC and Advanced Echo Cancellation. Phones never sounded so good.

**Livewire:** Nobody does broadcast phones better than Telos. And Telos builds the iQ6 exclusively for Axia. This'll get 'em talking.

**Time-of-day Clock:** Time-of-day clock can slave to your NTP server. Event timer has manual or auto-reset option.

**Mixing Console:**

- High-resolution OLED meters with VU & PPM ballistics and peak hold. Switchable displays let talent meter 2, 3 or 4 buses at once.
- 12-key dialing pad lets talent place calls without ever taking their eyes off the board.
- Push and rotate Options control to select source, adjust pan, trim gain and more.
- Rugged machined aluminum surface has anodized finish and markings that can't rub off. Backed with our 5-year warranty.
- Silky-smooth, side-loading 100mm, conductive-plastic faders feel great.
- Keep your eyes on the prize: Telco section OLEDs integrate hybrid control right into the board.
- Join multiple iQ frames with included hardware. It's desk-mount, so no need to cut the counter.
- OLED source / options display with audio confidence meter on every fader. They're sharp as a tack.
- Avionics-grade switches with LED lighting.
- Separate selection and volume controls for guest studio and control room monitors.
