

# Small budget? Big deal.

Your budget keeps shrinking while your responsibilities grow. You're doing more with less. And you've realized some console companies think that because you're cost-conscious, you'll settle for scraps. They toss you a stripped-down, featureless, lightweight toy of a console and expect you to feel grateful just because it costs less. Like they're doing you a favor. Wall-wart power supplies? Really?

Axia thinks you deserve better. We don't cut stuff out to reduce cost. Instead, we find ways to get you more for your money. Much more. Meet the new **iQ** radio console. Packed with major-market features. Like automatic mix-minus. Four stereo mix buses. Built-in phone integration. Avionics-grade switches, faders and displays. Rugged laser-engraved machined-aluminum construction. Snapshot console settings recall. A separate, rackmount engine with audio, logic, mixing, bulletproof power supply and a multi-port network switch built right in. Expandable to 24 faders. Everything professional-grade. No fans, no RCA connectors, no cheap faders or switches. And no wall-wart power supplies, for cryin' out loud.

A 16-fader iQ costs only \$9,985<sup>00</sup>. Really.
